EDUCATION

Bachelor of Science, Economics

Brigham Young University–Idaho

February 2021 – December 2025

Rexburg, ID

- Emphases: Data Science, Accounting, Statistics
- Societies: Economics Society, Data Science Society

EXPERIENCE

Industrial Engineer

Boise Cascade

January 2026 – April 2026

Elgin, OR

- Increased Dryer 3 weekly production capacity 9 percentage points by designing and implementing a Continuous Flow Analysis to identify and resolve bottlenecks in the drying cycle
- Applied regression analysis in R to test staffing levels against veneer recovery, correctly identifying a Hawthorne effect — rather than staffing — as the true driver of production gains, preventing a costly misallocation of resources
- Lead weekly meetings with 10 departments heads and plant leadership for inter department communication to coordinate 100+ employees on mill processes improvement

Power BI Intern

Eastern Idaho Public Health

August 2025 – December 2025

Idaho Falls, ID

- Built and automated Power BI dashboards to support internal decision-making and public-facing health awareness reporting
- Modeled vaping trend data using logistic regression to validate prevention program efforts success

Tutor

Brigham Young University–Idaho

September 2023 – February 2025

Rexburg, ID

- Led the Economics Lab tutoring team, translating complex economic theory into accessible concepts for 100+ non-technical students, improving comprehension outcomes
- Applied statistical analysis to identify key student success factors, improving tutor efficiency by 10%

Research Assistant

Brigham Young University–Idaho

January 2024 – July 2024

Rexburg, ID

- Extracted, cleansed, and validated over 1 million rows of test-question data to assess and improve question clarity
- Built data visualizations in R (ggplot2) and Latex to surface key insights for educators, enhancing test question quality and course materials

Bookkeeper

Richard L. Joliet, CPA

July 2022 – September 2022

Prescott, AZ

- Accelerated completion of client financial statements and tax returns by approximately 15% through process improvements
- Organized clear, structured summaries of expenses and revenue using QuickBooks and VBA-driven Excel tools to improve productivity of tax and payroll processing for local businesses

SKILLS & CERTIFICATIONS

Data Analytical skills: machine learning, econometrics, regression analysis

Tools: Python, R-Studio, VBA excel, SQL, Latex, Git Hub, Power BI

Other: Fluent in Spanish, Certified in Data Analytics statistics and accounting by BYU- Idaho, enjoys reading, and Martial Arts
